6-Year BSc/MD Program

Earn your Bachelor of Science (BSc) and Doctor of Medicine (MD) degrees in only six years with our accelerated pre-med to MD program.

SHELDON VOGT, MD

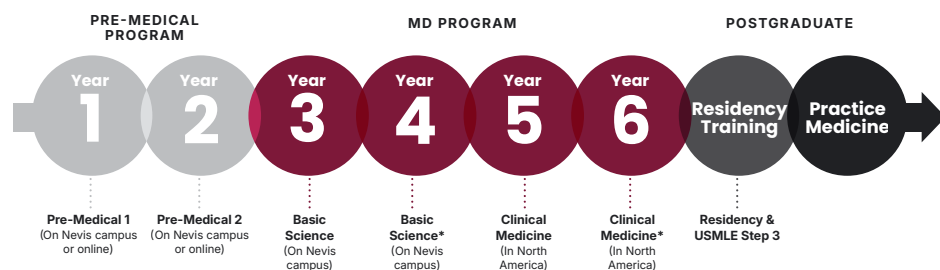

Resident Physician (Preliminary General Surgery),
Loma Linda University Health (California) | MUA Alum 2024

From Secondary to MD

The 6-Year BSc/MD Program offers a two-year pre-medical curriculum followed by entry into our 4-Year MD Program. The pre-medical program is offered on-campus or online and is a great choice for students with secondary school credentials who have always wanted to become practicing physicians.

This accelerated pathway allows participants to immerse themselves in medical education early-on; learn from faculty who also teach our MD program courses; develop strategies and habits to prepare for medical school requirements; save significantly on undergraduate tuition, fees and living costs; and achieve an MD degree two years earlier than those on the traditional four-year undergraduate degree plus four years of medical school pathway.

Your Student Journey

* USMLE Step 1 occurs in Year 4 and USMLE Step 2 CK occurs in Year 6.

"The campus culture was one where there was so much collegiality amongst all the students. You had individuals from different provinces, you had people from America and different parts of the world too... you really get to make lasting friendships for a lifetime."

Vijitha Mahalingam, MD

Resident Physician (Psychiatry), Queen's University (Ontario, CA) | MUA Alum 2019
